In-service Welding and Repair Welding Subcommittee – NDT Task Group

Co-chairs: Alan Beckett and Matt Boring

- Meeting was called to order at 9:00 am
- Introductions - 26 attendees were present
- The charter of the task group was discussed. It was decided to organize the Task Group into two working groups. One working group was tasked with reviewing the inspection practices for new construction applications. The second working group was tasked with inspection practices for in-service welding applications.
  - Kyle Lee volunteered to be the leader of the new construction working group. 10 volunteers joined the working group.
  - Bill Herasyniuk volunteered to be the leader of the in-service working group. 10 volunteers joined the working group.
- The working groups were tasked with the following items
  - Inspection methods
  - Acceptance criteria for weld types
  - Industry/company practices/RAGEP
  - Repair welding inspection practices of defective new construction welds and defective in-service welds both inspection during the repair and inspection of the completed repair weld
  - Inspection assessment prior to welding
- Both working groups met for approximately for 90 minutes to discuss way forward including future meetings.
- Adjournment approximately 12:45 pm
