Subcommittee Co-Chairs: Robin Gordon (Microalloying) and Tom Jarvie (Shell)

Working Group Meeting

- Date and Time: January 25th from 8.00 – 12.00.
- Attendance: Meeting attended by 30 individuals.

Reeling ECA Annex

- Objective of Task Group
  - Develop an ECA Annex for API 1104 to cover Offshore Pipelines installed by Reeling.
- Major Benefits
  - Eliminate workmanship flaw length requirements.
  - Enable ECA Flaw Interaction Criteria.
- Draft Annex issued to Task Group Members in June 2017. Meeting held at Shell.
- Draft Annex is being updated to incorporate comments and will be re-issued to Task Group 1st Qtr 2018
- General Discussion on scope of Reeling ECA Annex:
  - Detailed Procedure / Requirements: Multi Year Effort
  - General Guidelines (Guard Rails): 1 Year Effort
- Agreed that the Reeling ECA Annex should proceed as follows:
  - Develop generic Guidelines for inclusion in API 1104 as a new reeling ECA Annex.
  - In parallel develop an API Recommended Practice that provides more detailed guidance on Reeling ECA.
