API WIWC TG-5
Well Intervention Well Control Task Group
2015 API Summer Conference Update
API WIWC TG-5

Well Intervention Well Control Task Group

Chairman – Alex Sas-Jaworsky P.E
Vice Chairman – Jason Sasarak
Secretary – Vacant
API WIWC TG-5

Technologies Addressed

- Coiled Tubing
- Snubbing/Hydraulic Workover
- Wireline (Slickline and E-Line)
Standards Developed

• Recommended Practice 16ST

Coiled Tubing Well Control Equipment Systems

First Edition – March 2009

Reaffirmed December 2014
2015 RP 16ST TG Membership

- Operators (4)
- CT Vendors (7)
- Manufacturers (4)
- Consultants (1)
- Regulatory (1)
Current Activities

• 5-Year Review of RP 16ST

Further Align RP 16ST Standards with Established SC16 Standards to Maintain Consistency Where Possible
API WIWC TG-5

March 4, 2015 RP 16ST TG Mtg

• Discussed Test Results for CT Rams
• Adopted 10-Second Max. Closing Time for All CT Rams in Stack
• Continued Spec 16D Review for CT
May 8, 2015 RP 16ST TG Mtg

- Spec 16C Concerns Regarding PSL3 Class Well Control Valves & Devices
- Spec 16D Review Identified Changes Needed in CT Accumulator System
2015 Summer RP 16ST Priority

- Work Group Formed to Rewrite CT Accumulator System Requirements to More Closely Align With Spec 16D
- Working With Plug Valve & Swing (Articulated) Pipe Manufacturers to Meet Spec 16C Requirements
2015 Summer RP 16ST Priority

• Maintain Current Well Control Stack Configuration Requirements

• Address “Success Path” Method to Establish Barrier as a Combination of Sealing Device and Power System
2015 Summer RP 16ST Priority

- Work with Spec 16B Group to Define Performance Expectations & Testing for CT Well Control Stack Equipment
- Installed CT Well Control Stack Equipment Tests to Match Spec 16B
