1. **INTRODUCTION**

On June 18, 2003 the NWI was formally sanctioned by SC17 for the API task group to work on a revision to the recently passed joint API/ISO document. The API 17E task group would begin the revision process by correcting or supplementing areas of the document which were deemed weak or incorrect.

In October/November 2004, a NWI was formally submitted by Olav Inderberg to the ISO Committee.

2. **STATUS**

Adopt back by API was approved at the 2010 Summer Standardization Conference. The Specification for Subsea Umbilicals 17E was published in October 2010.

The API TG will submit the proper SRRR and NWI forms shortly and will begin the revision process again.
