API C2 / SC 17
SUBCOMMITTEE ON SUBSEA PRODUCTION SYSTEMS

RECOMMENDED PRACTICE FOR FLOWLINE CONNECTORS AND JUMPERS

TASK GROUP 17R STATUS REPORT

SUMMER MEETING - JUNE 2019
PREVIOUSLY REPORTED STATUS

Comments to the document solicited during Q4 2018. 145 comments received as follows:

- General – 8
- Editorial – 31
- Technical – 106

Additionally it was suggested that elements from 17H and 17X either be incorporated or referenced in 17R.

Following the Winter Meeting, an SRRR was submitted and approved to review and update 17R.
CURRENT STATUS

• A focused workgroup (5 people) got together twice this past quarter to review the 106 Technical Issues

• Of the 106 comments, 11 are believed to be significant enough to warrant a discussion/debate by a wider group
FORWARD LOOKING FOR REMAINDER OF 2019

• The co-chairs would like to have 3 to 4 working sessions with the “enhanced” workgroup during Q3 (first meeting to be in August) and Q4 of this year.
  • Address the remaining 11 Technical Issues
  • Review all other comments/issues and the proposed responses
  • Address relevant elements of 17H and 17X

• Up-Rev 17R to Rev 2 and submit back to API for ballot late Q4

• The co-chairs are specifically asking for participation/representatives from the following organizations (others will also be welcomed):
  • Exxon
  • Chevron
  • BP
  • GE
  • TechnipFMC
