SC-18 Liaison Report

TG-2: Quality Management System for the Manufacturing Sector – API Spec Q1

TG-5: Quality Management System for the Service Sector - API Spec Q2
TG-2 Quality Management System for the Manufacturing Sector

- TG has met every 2 months in 2019: meetings held in Feb, Apr, Jun, & Aug, Oct, and Dec.
- Work completed:
  - Drafted revisions to API Q1 to align with ISO 9001:2015
  - Solicited and resolved comments & suggestions from TG member companies: total of 61 comments as follows: 41 - technical; 16 - editorial; and 4 - general
  - Reviewed API Q1 audit findings by clause; drafted language in Q1 10th to address findings where additional clarity or new/revised requirement is warranted
  - Collaborated with TG 5 regarding scope and applicability of API Q1 and API Q2 and revised Q1 accordingly
TG-2 Quality Management System for the Manufacturing Sector

• Some highlights from the last TG2 meeting in Dec. 2019.

• Revising the title to Product or Related Process Organizations in the petroleum and Natural gas industry

• Product and Product-Related Processes added as new definitions

• Introductions in Q1 for other areas, such as manufacturing, engineering/design, product repair/remanufacturing, product-related process, welding, heat treating, machining, threading, inspection, testing, distribution
TG-2 Quality Management System for the Manufacturing Sector

• Clarify the 12 months time frame on internal audits or management review to take place be not later than the end of the same calendar month as the prior year.

• Clarify the use of processes that require validation to applicable API product specification.

• Work completed (cont.):
  • Reviewed requests for interpretations and the responses to determine if changes to Q1 are warranted
TG-2 Quality Management System for the Manufacturing Sector

• Future work planned:
  • Complete revisions needed to broaden scope of Q1 to non-manufacturing operations
  • Review FDIS of ISO 29001 and compare to upcoming ballot drafts of Q1 and Q2 and identify differences
  • Review drafts of Q1 and Q2 for alignment as appropriate
  • Perform complete review of current draft document as a whole

• TG wants to have the document finished and published by June 2020 or sooner.
TG-5: Quality Management System for the Service Sector

- API SC18 TG5 has met 3 times since the June 2019 meeting.
- Technical and editorial revisions of API Spec Q2 completed.
- Joint Work Group meeting with TG5 and TG2 conducted to review efforts to align documents where applicable
- Applicability of API Q1/Q2 work continues
TG-5: Quality Management System for the Service Sector

Future Work:

- Review of API Spec Q1 revisions to determine need for further revision to API Spec Q2
- Review final comments in August 2019 and submit the document to ballot.

Future Meeting Dates: August – final review
