API C2 / SC 17

SUBCOMMITTEE ON SUBSEA PRODUCTION SYSTEMS

API 17 TR13

General Overview of Subsea Production Systems

REVISION TASK GROUP STATUS

January 7, 2016
1. INTRODUCTION

At the SC 17 summer meeting of 2014 it was agreed to delete Annex A from API 17A and to resubmit the information as a Technical Report, being API 17 TR13. The logic behind this decision was:

- to reduce the sheer bulk of 17A,
- to remove the need to routinely update the contents of Annex A (which contains primer type information) each time 17A itself is reissued,
- to retain the information in Annex A, so that it is not lost.

Consistent with this logic, the proposal agreed to, was to transfer the current contents of Annex A into TR13, with a minimum of effort i.e. no substantive changes/modifications/additions were envisaged, and no future revisions to TR13 would be made.

Document has been balloted, revised to address all comments and is now ready for release.

2. STATUS

TR13 was successfully balloted in early 2015:

- 23 affirmative, 1 negative, 2 abstain, 3 did not vote
- Response rate = 90% (>50% req’d), Approval rate = 96% (>66.7% req’d)
- Consensus - YES

A total of 138 + 2 = 140 comments were received back:

- 46 comments had been directly duplicated = 94
- 3 comments (negative vote & abstentions) required no response = 91
- 72 comments were actioned (Agree/Agree in Principle) = 19
- 6 comments were not actioned (Disagree) – follow-up = 13
- 5 comments related to modifications of drawings - API to edit drawings = 8
- 8 comments would require substantive changes to the document = 0
- new illustrations
At this time, the document has been balloted, revised to address all comments and is now ready for release.

3. MEMBERSHIP

Task Group membership:

<table>
<thead>
<tr>
<th>Name</th>
<th>Company</th>
<th>Email</th>
</tr>
</thead>
<tbody>
<tr>
<td>David Wilkinson</td>
<td>ExxonMobil</td>
<td><a href="mailto:dave.r.wilkinson@exxonmobil.com">dave.r.wilkinson@exxonmobil.com</a></td>
</tr>
</tbody>
</table>

4. UPDATED TARGET DATES FOR DELIVERABLES

Intend to publish TR13 in early 2016.

5. MAJOR ISSUES

No known issues.

6. ANTICIPATED NEW WORK ITEMS

None

7. PLANS FOR FUTURE MEETINGS

None at this time.

8. RESOURCE NEEDS

Depends on forward plan.
